Advisors Dr. Silju Mathew, Dean – FDS, RUAS
Dr. Kavitha Prasad, Assoc. Dean, FDS, RUAS

Coordinators Faculty & Interns,
Dept. of Oral & Maxillofacial Pathology & Oral Microbiology

**Contests
Coordinator** Dr. Surendra L., MDS
Dept. of Oral & Maxillofacial Pathology & Oral Microbiology

Attractive
Prizes &
Certificates to
be won

“National Oral Pathologists’ Day” on 25th February 2023

Guest Lecture – 11.30 am – 1.00 pm

Dr. Suma S

Topic: Oral Pathology Beyond the Microscope - Role in Dental Practice

Oral and Maxillofacial Pathology acts as a backbone of dentistry by investigating the causes, processes, and effects of the disease. It is the only branch in dentistry that acts as a bridge between clinical sciences and basic sciences. A skilled oral pathologist has trained eyes for lesions specific for the oral cavity and can identify the conditions easier when compared to general practitioners. Being an oral pathologist does not mean merely handling microscopes, but also diagnosing histopathology, molecular diagnostics, teaching, research, and above all has the capability to be a successful clinician. This lecture highlights the multifaceted role of an Oral Pathologist in Clinical Practice.
