One Month
22 November 2021 - 20 Dec 2021**

Introduction:

“The Secret of great fashion is to choose and feel good in what you wear, take full advantage of every style what comes on your way”. Fashion Designing is one of the most exciting and challenging sector. Evolutionary and innovations in the production of textiles, apparels and clothing has opened the gate way for intelligent fashion in the forth coming years. Quick response for the customer demands is the need for the day in the fashion design world. Innovative designing, showcasing and promotion of design is most important in fashion sector. The outdoor visits provides a solid foundation for understanding the state of the art for the industries. The organisation of International Hackthon will help in network building amongst the designs professionals, overall understanding and learning of technological aspects, integration of theory and practical application skills to meet the needs of related industry and society in larger perceptive.

Objectives:

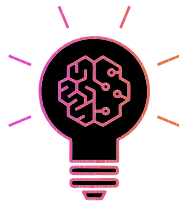

1. To conceptualize, ideate and develop an innovative research design related to textiles, apparels and fashion
2. To design and showcase the apparels, haut couture designs and folios as per theme
3. To Inculcate strong human values, social, interpersonal, and leadership skills required in designing
4. To recognise the talents in the fashion designing sector
5. To build global professional networking and sharing of ideas
