Biochemistry

Department of Biochemistry, RMC

1st MBBS 2021 – 2022 Batch

OSPE methods report used for summative / formative
assessment report of UG 2021-2022

For 1st MBBS 2021-2022 batch OSPE (Objective Structured Practical Examination) was conducted during the Formative and Summative practical examination as per CBME RS4 RGUHS curriculum. Total marks for OSPE was 20 for 04 OSPES (5marks each) of which 03 OSPES were response stations (Cognitive and Psychomotor domains) and 01 OSPE was a performance station (Cognitive Psychomotor and Affective domains).

Student Centric Teaching Learning Methods

Batch 2020 - 2021

1. Training at ALC for undergraduate students
2. Small group teaching
3. Quiz/ MCQ
4. Video based teaching
5. Assignments and MCQs at the end of each online class
6. Computed assisted learning for animal experiments
7. Skill certification based on OSPE/ OSCE style

1. Training at ALC for undergraduate students

The students in the first year of MBBS are given training in methods of clinical examination in the Physiology department. As an extension to this regular curriculum, the students were given a hands-on training experience at the Advanced Learning Centre integrated with the Dept. of Emergency Medicine. Around 150 students attended the workshop over the three days.

The ALC has in its possession state-of-the-art simulators for the clinical training of medical students as well as practitioners. The simulators are used for mimicking various medical conditions encountered in day-to-day practice.

At the center, each MBBS student went through 5 training stations. The students practiced standard Basic Life Support Skill on simulators. Good quality CPR delivery and Artificial Respiration was taught in details.

At the end of each session, the students were requested to fill out a feedback form online, to understand their experience and to evaluate the effectiveness of the program.

2020 – 2021 basic life support skill	Date
Batch B	25/10/2021
Batch C	26/10/2021
Batch A	27/10/2021

2. Small group teaching

There is a paradigm shift in the Teaching learning activities in education in general and Medical education in particular. There is a migration from teacher centered teaching learning to student centered teaching learning activity. In this educational set up teacher functions as a facilitator and student is encouraged to learn activity. Conventional theory classes having a didactic component is being debated exclusively now a days. . Didactic lectures do not promote active involvement of large majority of the students. The learning has become predominantly passive in lecture classes. The current emphasis is more on Small group interactive teaching learning activity. This ensures active participation of majority of the students. In the second week of each month students undergo small group teaching and viva voce.

1. QUIZ/MCQ

2020-2021	TOPIC	DATE
1. MCQ 1	Blood, CVS	17/04/2021
2. MCQ 2	Renal and Endocrine systems	14/07/2021
3. MCQ 3	Special Senses	12/10/2021

Students were encouraged to take up additional learning in a competitive environment. Subject quiz was used as a tool to promote learning in addition to the curricular content.

In quiz, student's analytical abilities, communication skills and problem solving ability will be promoted.

4. Video based teaching

Many practical demonstrations during their online classes occurred. Students were also shown videos where ever appropriate in the theory classes for better assimilation and interest of the topic

5. Assignments and MCQs at the end of each online class

The students were given questions and MCQs for better grasp on the topics taught online, at the end of each theory and practical class. This was followed up in the revision classes that followed. Assignment and MCQs given this way helps students to participate better in the online classes and comprehend the topics well.

6. Computed assisted learning for animal experiments

Computer assisted learning	19/11/2021
----------------------------	------------

The use of Computer assisted learning at the C.A.L. Laboratory is an innovative learning technique to teach about amphibian and mammalian experiments. It is an interactive session where the students learn online and visualize many experiments.

The students utilized the software to learn exhaustively on Amphibian and Mammalian experiments. Charts were also shown and discussed pertaining to the same for better comprehension.

7. Skill certification based on OSPE/ OSCE style

Skill certifications on objective structured physical examination and objective structured clinical examination was done at various stations for a complete understanding of Clinical Physiology Experiments. The students were graded based on their performance in the physiology logbooks by the faculty. This was carried out in the different practical session hours allotted for the same batch wise.

Skill certification checklist: Examination of effect of exercise on blood pressure

Name of Student: *Shubham J*

Phase of MBBS: *1st phase*

Subject: *Physiology*

Skill: *Examination of effect of exercise on BP*

Date: *18/10/21*

Competency Number: *PY 5.12*

Certifier: *Zainab r ma'am*

Satisfactory (✓), unsatisfactory (X)

Steps	Attempt I Date:	Attempt II Date:	Attempt III Date:
<ul style="list-style-type: none"> • Greets and explains procedure to subject. • Positions subject (supine-lying down) and rests for 5 minutes approximately. • Upper limb is rested on the bed, palm turned up. • Exposes the subject's arm at least 5 inches above the elbow. • Place the cuff snugly on bare arm after deflating it. • The center of the arm cuff (rubber part) is positioned over the line of the brachial artery. • The lower edge of the arm cuff is 2-3 cm above the elbow crease. • Radial artery is located and palpated. • The arm cuff is inflated by using the rubber bulb till the radial pulse disappears. • The pressure corresponding to the disappearance noted. • The arm cuff is deflated slowly till the radial pulse reappears. • The pressure corresponding to the reappearance noted and recorded as systolic blood pressure. • Auscultatory Method: • Releases the air from the cuff and waits 2 minutes. • Increase the pressure 20 mm Hg above the systolic pressure as recorded by palpatory method. • Places the stethoscope properly (ear piece directed anteriorly and medially) Check if bell of the Steth is Switched on. • Places the diaphragm of the stethoscope over the 	<ul style="list-style-type: none"> ✓ ✓ ✓ ✓ ✓ ✓ ✓ ✓ ✓ ✓ ✓ ✓ ✓ ✓ ✓ ✓ ✓ ✓ ✓ 		

brachial artery.

- Deflates the arm cuff slowly at about 2 mm Hg each time.
- The pressure corresponding to the appearance of sound is recorded as systolic BP.
- The pressure is further reduced gradually and slowly.
- The pressure corresponding to the disappearance of sound is recorded as diastolic BP.
- Remaining air in the cuff is released thereafter by opening the valve completely.
- With blood pressure cuff in situ (but disconnected from Mercury reservoir), ask the subject to do spot jogging at 30/min. (while jogging thighs should be brought up to horizontal level).
- Ask the subject to stop exercise when the subject is not able to continue/feels discomfort at 5 minutes whichever occurs first.
- Let the subject relax in the chair and again record the blood pressure by auscultatory method immediately, after 1, 2 and 3 minutes.
- Tabulate the findings.

findings.

- Give proper instructions to the subject.
- Explain properly that you will be eliciting pain.
- Ask the subject to close his/her eyes.
- Pinch the bulk of the muscle of the right upper limb and ask the subject to say whether he/she feels pain.
- Repeat the procedure on the other upper limb and compare the finding.
- Report your findings.

Elicit thermal sensation in the given subject and report your findings.

- Arrange two test tubes with water that is maintained at two temperatures (warm :40° C and cold : 25° C)
- Give proper instructions to the subject.
- Ask the subject to close his/her eyes.
- Touch each of the test tubes to one upper limb and ask to identify the temperature as warm or cold.
- Elicit thermal sensation on the other upper limb and compare the finding.
- Report your findings.

Perform tactile localization in the anterior aspect of the forearms of the given subject and report your findings

- Give proper instructions to the subject
- Ask the subject to close his/her eyes.
- With the help of a pen, touch the right upper limb at a particular point and ask the subject to locate the same point .
- Repeat the procedure on the other upper limb and compare the finding.

- Report your findings.

Test the vibration sense in the upper limbs of the given subject and report your findings

- Select a tuning fork of 128 Hz
- Give proper instructions to the subject.
- Vibrate the tuning fork by holding the stem by striking it against the hypothenar eminence of examiner's hand.
- Immediately place the vibrating tuning fork on a bony prominence of the upper limb e.g. (radial styloid olecranon process and ask the subject to report when the vibration ceases.
- When the subject gives indication of the cessation of vibration, immediately place the tuning fork on the same point on the same part on yourself to feel if the vibration has actually ceased.
- Repeat the procedure on the other upper limb and compare the vibration sense as appreciated by the subject and examiner
- Report your findings.

Test the sensation of joint movement and position in the upper/ lower limbs of the given subject and report your findings.

- Give proper instructions to the subject (to recognize a particular position of the limb when the limb is moved).
- Ask the subject to close his/her eyes.
Move his/her thumb/ great toe up or down and ask the subject to indicate the direction of movement .
- Repeat the procedure with the other joints of the limb (distal to proximal) repeat the test on other limb.
- Keep one limb in a particular position and ask the subject to keep the other limb in a similar position.
- Report your findings.

Elicit stereo gnosis in the given subject and report

<p>your findings.</p> <ul style="list-style-type: none"> • Give proper instructions to the subject. • Ask the subject to close his/her eyes. • Give a familiar object to the subject's hand and ask him/her to identify it. • Repeat the procedure on the other side. • Report your findings. 	✓		
<p>Elicit graphesthesia in the given subject and report your findings.</p> <ul style="list-style-type: none"> • Give proper instructions to the subject. • Ask the subject to close his/her eyes. • Using a blunt object, trace digits or letters on subject's forearm or back and ask the subject to identify. • Elicit graphesthesia on the other forearm and compare the finding. • Report your findings. 	✓

Skill certification checklist: Examination of Reflexes

Name of Student: *Shubham J*

Phase of MBBS: *1st phase*

Subject: *Physiology*

Skill: *Reflexes*

Date: *18/11/21*

Competency Number: *PY10-11*

Certifier: *Dr. Zamab*

Satisfactory (✓), unsatisfactory (X)

Steps	Attempt I Date:	Attempt II Date:	Attempt III Date:
<p>Superficial reflexes:</p> <p>Explains procedure to subject for each of the following:</p> <p>Plantar reflex:</p> <p>Asks the subject to lie down exposing the sole of the foot.</p> <p>With the help of a blunt object stroke the sole, from heel along the lateral border of foot and then medially along the base of the toes towards the ball of the great toe.</p> <p>Reports the finding indicating the direction of the movement of the toes (flexor response/Babinski's sign)</p> <p>Mentions the level of integration on asking (L5, S1)</p> <p>Abdominal reflex:</p> <p>Asks the subject to lie down in supine position</p> <p>Expose the abdomen fully</p> <p>With the help of a key, strokes parallel to costal margin towards the midline both below and above umbilicus</p> <p>Observes and reports the contraction of abdominal muscles</p> <p>Mentions the level of integration on asking (T8 to T12)</p> <p>Deep reflexes:</p> <p>Biceps jerk:</p> <p>Places subject's forearm in semi-flexed</p>	<p>✓</p> <p>✓</p> <p>✓</p>		

<p>position supported by his/her forearm in relaxed state. Places thumb on the tendon of biceps in cubital fossa. With the help of knee hammer taps on the thumb.</p>	✓		
<p>Observes and reports (the contraction of biceps and flexion of forearm)</p>			
<p>Mentions the level of integration on asking (C5, C6) Triceps jerk:</p>			
<p>Supports the forearm of subject on his/her arm at right angles.</p>	✓		
<p>Taps the tendon of triceps just above olecranon. OR</p>			
<p>Asks the subject to place his hand on opposite shoulder and taps triceps tendon.</p>			
<p>Observes and reports. (the contraction of triceps and extension of forearm)</p>			
<p>Mentions the level of integration on asking (C6, C7)</p>	✓		
<p>Supinator jerk:</p>			
<p>The subject's forearm is held in semi-prone position and subject's limb is supported on examining student's forearm</p>			
<p>Taps the styloid process of the radius.</p>			
<p>Observes and reports (contraction of supinator flexion of elbow and eversion of wrist)</p>	✓		
<p>Mentions the level of integration on asking (C5, C6)</p>			
<p>Knee jerk:</p>			
<p>(ask to demonstrate either sitting or supine position)</p>			
<p>Sitting position:</p>	✓		
<p>Asks the subject to sit on chair with legs relaxed and not touching the ground / legs crossed. Knee of the examining lower limb is exposed. With</p>			

<p>knee hammer, taps on the patellar tendon just above tibial tuberosity</p> <p>Lying down position. Asks the subject to lie down supine. Positions the limb at 60 degree angle from bed. The student passes the hand underneath the testing limb, rests the hand on the opposite limb and the limb to be tested is slightly raised</p> <p>The tendon is tapped</p> <p>Observes and reports (contraction of quadriceps and extension of knee)</p> <p>Mentions level of integration (L2, L3, L4)</p> <p>Ankle jerk: (ask to demonstrate either sitting or supine position)</p> <p>Standing position: Asks the subject to place the limb to be examined on the stool with knee flexed at right angles to thigh.</p> <p>Dorsiflexes the ankle.</p> <p>Taps the tendoachillis with knee hammer</p> <p>Lying down position:</p> <p>Makes the subject lie down. Positions the leg slightly flexed at the knee and foot slightly dorsiflexed.</p> <p>Holds the big toe gently and taps tendoachillis</p> <p>Observes and reports (contraction of gastrocnemius muscle with plantar flexion)</p> <p>Mentions level of integration (S1, S2) report the findings.</p>	<p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p>

Skill certification checklist: Examination of Cranial Nerves I-VI

Name of Student: Shubham J
 Subject: CN I-VI
 Skill:

Phase of MBBS: 1st phase

Date: 18/11/21

Competency Number: PY10-11
 Satisfactory (✓), unsatisfactory (X)

Certifier: Dr. Zambis

Steps	Attempt I	Attempt II	Attempt 'n'
	Date:	Date:	Date:
<p><u>Olfactory (I) Cranial Nerve</u></p> <p>Examine the first cranial nerve.</p> <ul style="list-style-type: none"> • Give instructions to the subject about the procedure. • Check that the nasal passages are clear. • Ask the subject to close his eyes and shut one nostril with a finger. • Present commonly available odors such as coffee, asafoetida, camphor and ask the subject to sniff, 2cm in front of nose. • Report the observations. 	✓		
<p><u>Optic (II) Cranial Nerve</u></p> <p>Examine distance vision in the given subject.</p> <ul style="list-style-type: none"> • Make the subject sit/stand in a well illuminated room 6m (20ft) from Snellen's chart • Ask the subject to completely cover the non-test eye (after asking them to remove the spectacles, if using). • Ask the subject to read line by line from the top of the chart downwards. • Mark the vision according to the distance and line read. • Check the other eye. • Check the vision with both eyes open and with spectacles on (if using). • Report the findings. 	✓	✓	

Examine near vision in the given subject.

- Make the subject sit/stand in a well illuminated room and hold Jaeger's chart (at a distance of 25 cm). ✓
- Ask the subject to completely cover the non-test eye (after asking them to remove the eye wear if wearing any). ✓
- Ask the subject to read line by line from the above of the chart downwards. ✓
- Mark the vision according to the line read.
- Check near vision for the other eye and with eye wear on (if using).
- Report the findings.

Check for field of vision of the subject using confrontation test: ✓

- Give proper instructions to the subject.
- Make the subject sit comfortably on a stool.
- Sit at a distance of about 3 feet from the subject taking care that examiner's eye level remains at the level of the subject. ✓
- Ask the subject to fix his/her gaze at the examiner's eye and instruct the subject to say 'yes' when he/she sees the tip of examiner's finger in the field of vision.
- Ask the subject to close one of his/her eyes and while closing examiner's opposite eye. ✓
- Move examiner's finger midway between examiner and the subject, from the periphery to the center of four quadrants to check the field of vision. ✓
- Compare the field of vision of the subject to that of the examiner's ✓
- Repeat the procedure with the other eye.
- Report the findings.

Examine colour vision in the given subject.

- Give proper instructions to the subject.
- Ask the subject to sit comfortably in a well-lit room. ✓
- With both eyes open, from a distance of about 25 cm, instruct the subject to read the numbers or trace the lines in each plate of the book (Ishihara's Chart). ✓
- Note if he/she reads the numbers or traces the pathway properly.

<ul style="list-style-type: none"> • Compare the numbers read to the reference chart. • Report the findings. <p>Examine for direct light reflex in the given subject.</p> <ul style="list-style-type: none"> • Give proper instructions to the subject. • Make the subject sit comfortably facing away from any bright light. • Ask the subject to fix the eyes on a distant point straight ahead. • Bring a bright torchlight from the side to shine on the pupil of one eye. • Look for changes in the pupil. • Repeat the procedure on the other side. • Report the findings. <p>Examine for indirect/consensual light reflex in the given subject.</p> <ul style="list-style-type: none"> • Give proper instructions to the subject. • Make the subject sit comfortably facing away from any bright light. • Ask the subject to fix the eyes on a distant point straight ahead and arrange to block the torch light to shine into the left eye. • Bring a bright torchlight from the side to shine on the pupil of right eye. • Look for changes in the pupil of the left eye. • Repeat the procedure on the left side and observe the right eye. • Report the findings. 	<p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p>	<p>2020/01/13</p>

I have received detailed feedback on my performance including my grade, the errors that I have committed and actions to be taken. (student's signature)	A/R		

Skill certification checklist: Examination of Cranial Nerves VII-XII

Name of Student: *Shultham b*

Phase of MBBS: *1st phase*

Subject:

Skill: *CN VII-XII*

Date: *18/11/21*

Competency Number: *PY10.11*

Certifier:

Dr. Zamrah

Satisfactory (✓), unsatisfactory (X)

Steps	Attempt I	Attempt II	Attempt 'n'
	Date:	Date: Date:
<p>Examine the VII cranial nerve of the subject and report your findings.</p> <ul style="list-style-type: none"> • Give proper instructions to the subject. • Ask the subject to frown and raise both eyebrows • Ask the subject to shut his/her eyes against (examiner's) resistance. • Ask the subject to show his/her teeth, smile and whistle. • Ask the subject to inflate his/her mouth and blow out the cheeks. • Ask the subject to clench his/her teeth and depress the sides of the month. Look for the prominence of the platysma muscle. • Ask for testing taste sensations from anterior two-thirds of the tongue (need not perform). • Report the observations. <p>Examine the VIII cranial nerve of the subject and report your findings.</p> <p><u>Perform Rinne's Test</u></p> <ul style="list-style-type: none"> • Give proper instructions to the subject and make them sit comfortably in a quiet room. • Hold the stem of the tuning fork, after striking one of its prongs on the hypothenar eminence of examiner's palm • Place its base immediately on the mastoid process and ask the subject to raise the hand when the sound stops. • Then immediately bring the prongs in front of the ear and ask if the sound is still audible. • Repeat the test on the other side. • Report the findings. 	<p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p>		

Perform Weber's Test

- Give proper instructions to the subject and make them sit comfortably in a quiet room.
- Hold the stem of the tuning fork, after striking one of its prongs on the hypothenar eminence of examiner's palm.
- Vibrating tuning fork is placed over the middle of the forehead or the vertex of skull.
- Subject is asked in which ear the sound is heard better.
- Report the findings.

Examine the IX cranial nerve of the subject and report your findings.

Steps

- Give proper instructions to the subject and ask him to sit comfortably on a stool.
- Check for taste sensation in the posterior 1/3rd of the tongue. (need not perform)
- Ask the subject to open his/her mouth wide, and with the help of a swab stick touch the back of the pharynx and observe the contraction of the posterior pharyngeal wall. (need not perform)
- Ask the subject to open his/her mouth widely and then touch the mucous membrane covering the soft palate. Look for the elevation of the uvula. (need not perform)
- Report the findings.

Examine the X cranial nerve of the subject and report your findings.

- Give proper instructions to the subject and make him/her sit comfortably on a stool.
- Ask subject to say "aah" and observe if the contraction of both sides of palatal arch are symmetrical.
- Ask the subject to open his/her mouth wide, and with the help of a swab stick touch the back of the pharynx and observe the contraction of the posterior pharyngeal wall. (need not perform)
- Ask the subject to open his/her mouth widely and then touch the mucous membrane covering the soft palate. Look for the elevation of the uvula. (need not perform)
- Report the findings.

Examine the XI cranial nerve of the subject and

<p>report your findings.</p> <ul style="list-style-type: none"> • Give proper instructions to the subject and ask him/her to sit comfortably on a stool. • Stand behind the subject and place your hands on both the shoulders. • Ask the subject to elevate his/her shoulders. Try to prevent this by applying pressure (resistance) • Ask the subject to move his/her face to one side. Try to prevent it by opposing his face movement, and look for the prominence of the sternocleidomastoid muscle of the opposite side of the neck. • Repeat the procedure to check the action of the sternocleidomastoid muscle of the opposite side. • Report the observations. <p>Examine the XII cranial nerve of the subject and report your findings.</p> <ul style="list-style-type: none"> • Give proper instructions to the subject and make him comfortably on a stool. • Ask the subject to protrude tongue and note if the median raphe is concave to towards one side (i.e. paralyzed side). • Observe for atrophy/fasciculation/tremor if present. • Ask the subject to move the tongue from side to side against the cheek & resist the tongue movement by pressing it from outside on the cheek. • Report the observations. 	<p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p> <p>✓</p>

REPORT ON THE FORMATIVE ASSESSMENT- OSCE PATTERN FOR MEDICINE POST GRADUATE STUDENTS

Department of Medicine has conducted a formative assessment for the post graduate students of Medicine on 17th September 2021. This was using a virtual OSCE platform. The question paper was set by the professors of the department. There were 10 OSCE stations comprising of interpretation of ECG, Chest X ray, MRI Brain, Spotters of various diseases, Peripheral smears, case scenarios of various diseases, Interpreting clinical signs. The answer scripts were evaluated by the senior faculty and the feedback was given to the students. The OSCE pattern of assessment provides an objective way of assessment of the students. We plan to conduct these assessments every month.

POST GRADUATE ASSESSMENT – OSCE PATTERN
MAXIMUM MARKS – 50
Date – 17-09-2021

3rd YR Post graduates

SL NO	NAME	MARKS
1.	Dr. Tejas	33
2.	Dr Vijay Balaji	40
3.	Dr Ujjwal M A	30
4.	Dr Kaushik	27
5.	Dr. Rohit.N	36
6.	Dr. Bhavishya	32
7.	Dr Priyanka. P	30
8.	Dr Priyanka Vashishth	28

2nd Year Post graduates

1.	Dr Ramya	34
2.	Dr Anusha	29
3.	Dr Manas Gundala	28
4.	Dr Megha Birajdar	30
5.	Dr Shravani	35
6.	Dr Hemanth	32
7.	Dr Rutva Harish	30
8.	Dr Puneeth	29
9.	Dr Swathi Kiran	32
10.	Dr Varun Vinayak Rao	35
11.	Dr Deekshitha Reddy	36
12.	Dr Syed Atif	27
13.	Dr Rahul H	37
14.	Dr Thejaswi	34
15.	Dr Nithin Kumar R	30
16.	Dr Gururprasad Khandre	30
17.	Dr Faisal	32
18.	Dr Nithin K P	29
19.	Dr Guruprasad R	33
20.	Dr Lavanya	Absent
